Ambient Air Monitoring

Course # 222

This one-day course covers the basic design and theory of ambient air monitoring, including the State Implementation Plan Process, quality assurance and control methods as they relate to monitoring instruments, site development criteria and data processing. This course will address PM 2.5 and other particulate methods, ozone, oxides of nitrogen, carbon monoxide, hydrocarbon, sulfur dioxide, meteorology systems, data recording systems, gas calibration systems, and zero air systems.

July 28, 2010

8:30 AM - 5:00 PM

**San Diego Air Pollution Control District
10124 Old Grove Road
San Diego, California 92131
Conference Room**
